

Leaving Certificate Applied Mathematics

Face-to-Face

National Seminar 5

In support of teachers implementing the new Applied Mathematics specification, the fifth national seminar will take place, in-person, in April and May 2022. This seminar is open to all teachers who are interested in teaching Applied Mathematics, including newly qualified teachers. Sub-cover will be provided for teachers attending.

National Seminar 5 will be delivered in-person, on 14 separate dates and will provide participants with the opportunity to explore:

- the concepts of work, energy and conservation of energy through mathematical modelling
- Two case studies of teachers and students who engaged in a modelling project
- Bellman's Principle of Optimality and its applications
