LETHE PROJECT

(e-)learning the invisible history of Europe

WHAT is LETHE? It is a digital history platform designed for students aged 10 to 14. It was created by a team of over 30 history education experts from 10 European countries using the latest in innovative history teaching practices.

WHAT does it do? The purpose is to uncover and to explore hidden marginalised and silenced histories.

HOW does it do it? The platform provides teachers and students with the tools and resources to work as historians to explore 21 hidden histories (including 3 Irish cases – see QR codes) and to recover hidden histories in their own communities themselves.

WHY is this important? Incorporating hidden histories into our teaching introduces our students to the diversity and complexity of human history, providing a more accurate and inclusive understanding of the past.

For further information, please scan QR code or contact:

What can we learn about the lives of people from the past through the objects they left behind?
